IT Lead Manager & Software Architect

Monterrey, Nuevo León, Mexico | erickleon.bs@gmail.com | +52 81 1636 7973 | [linkedin.com/in/erick-leon-7b81b838a/](https://www.linkedin.com/in/erick-leon-7b81b838a/)

Professional Profile

IT Leader and Software Architect with over **8 years of experience** designing, developing, and managing scalable platforms. Specialist in creating corporate ecosystems and integrating Artificial Intelligence to automate operational processes. Results-oriented management approach focused on resource optimization and building high-performance teams, combining a solid Full-Stack technical foundation with sharp product and business vision.

Technical Skills

Architecture & Development

- Java, Python, Angular, React, NestJS, TypeScript
- SaaS/CRM Architecture Design

Artificial Intelligence

- LLM Implementation, Prompt Engineering
- Gemini API, Grok, VertexAI
- Workflow Automation

Management

- IT Team Leadership
- Technology Project Management
- Strategic Business Vision

Languages

- **Spanish:** Native
- **English:** B2 (Upper)

Professional Experience

2026 – PRESENT

Grupo Lyonez — *Founder & Software Architect*

- **Product Development (SaaS):** Led the architecture and launch of Lilfy (<https://lilfy.io>), a scalable CRM designed to optimize the B2B sales cycle. Implemented automations that reduce administrative workload by **30%**, enabling more agile and effective lead tracking.
- **Artificial Intelligence Integration:** Designed and deployed AI agents (using Gemini and VertexAI APIs) to qualify leads and centralize communication, achieving an estimated saving of **10 weekly hours** of operational work per user.
- **Technology Strategy:** Defined data architecture and deployed cloud solutions to support continuous product growth across various industry verticals.

2024 – 2026

Compartamos — *IT Lead Manager*

- Provided technical and operational leadership to cross-functional teams for the development, maintenance, and evolution of mission-critical business applications.
- Supervised technical architecture and made strategic decisions regarding the tech stack (Java, Python, Angular, React) to ensure high availability, efficiency, and security of financial systems.

2020 – 2024

Banorte — *Application Engineer*

- Developed and maintained enterprise-grade applications, ensuring optimal performance and stability for banking sector users.
- Actively collaborated in the full Software Development Life Cycle (SDLC), integrating robust solutions within complex, high-transaction corporate ecosystems.

2019 – 2020

Afirme Seguros — *Full-Stack Developer*

- Built dynamic user interfaces and developed server-side logic, ensuring a seamless connection between Front-End and Back-End.
- Optimized internal systems to improve information flow and response speed in insurance policy management.

2018 – 2019

AdInfinitum — *Front-End Developer*

- Developed interactive and responsive web interfaces, implementing continuous improvements in user experience (UX) and platform accessibility.
